ELEVEN01

Welcome!

2018 has been an exhilarating year for Eleven01 and 2019 brings with it a whole slew of new and exciting opportunities. This is the first edition of our monthly newsletter and going forward we will use this communication to keep you abreast of all things Eleven01

We have been building Eleven01 to foster blockchain development and a ecosystem that sustains the momentum of this disruptive technology; and on that note, we have recently launched the Eleven01 developer portal - DEV01 to help developers across the globe bring their blockchain ideas to life.

With Eleven01 testnet now live and dApps being onboarded, 2019 is going to be a year where we continue to build on our vision of bringing blockchain to the next billion users. Here are some notable highlights in the Blockchain space from January & February 2019.

FROM THE CEO'S DESK

"At Eleven01, we are not just building a product but a whole ecosystem by facilitating blockchain development that gives engineers a platform to innovate and create innovative solutions. We have launched DEV01, a comprehensive resource to help you guide step-by-step on how to build and integrate your decentralised applications unto the Eleven01 protocol. And this is just the beginning. In the coming months, you will see us forging more partnerships, building new technology and expanding into new markets. Thank you for being part of this exciting journey" - **Ausaf Ahmad, CEO, Eleven01**

PARTNERSHIPS

Tech Mahindra
We have entered into a strategic partnership with Tech Mahindra, one of the largest IT services company globally with over 113,000 employees and a $10B market cap. The partnership will enable both parties to co-build technology, share expertise and go-to-market together. This is a unique and budding partnership that will continue to grow deeper in the coming months.

KHETHINEXT
To bolster technological innovation in the agriculture sector, we have partnered with KHETHINEXT. KHETHINEXT is focused on developing a dApp that will equip farmers with a platform to help improve their productivity. With over 200k farmers onboarded, the sheer scope of using Eleven01 protocol to impact lives in a positive way is immense and we are eager to continue building on our joint roadmap.

State Government of Goa
We have signed an MoU with the State Government of Goa to facilitate the development of a thriving engineering ecosystem and explore several PoC opportunities towards making the state a blockchain hub in India. We will devise blockchain policies to bring global interest and participation to the State of Goa.

Genesis Hack
We are co-hosting Genesis Hack - the world's largest blockchain hackathon - to cultivate a blockchain-ready developer community in India and beyond by providing technology support and industry expertise. By sharing their knowledgeable insights on the industry's working, the Eleven01 team will serve as a trusted advisor and a reliable mentor to the hackathon's developers.

NEWS

Eleven01 testnet - now live - provides users with an ecosystem to create, publish, and extend the core blockchain services offered through the platform..
